

```
class TrainTicket {  
    double getFare() {  
        return 0;  
    }  
}
```

```
class GeneralTicket extends TrainTicket {  
    @Override  
    double getFare() {  
        return 150.0;  
    }  
}
```

```
class AC1Ticket extends TrainTicket {  
    @Override  
    double getFare() {  
        return 1200.0;  
    }  
}
```

```
public class TicketFareExample {  
    public static void main(String[] args) {  
        TrainTicket t1 = new GeneralTicket();  
        TrainTicket t2 = new AC1Ticket();  
  
        System.out.println("General Class Fare: Rs. " + t1.getFare());  
        System.out.println("AC 1-Tier Fare: Rs. " + t2.getFare());  
    }  
}
```
