

```
class TrainTicket {  
    void printTicket() {  
        System.out.println("Printing basic train ticket...");  
    }  
}
```

```
class OnlineTicket extends TrainTicket {  
    @Override  
    void printTicket() {  
        System.out.println("Printing Online Ticket with QR Code...");  
    }  
}
```

```
class CounterTicket extends TrainTicket {  
    @Override  
    void printTicket() {  
        System.out.println("Printing Counter Ticket with Stamp...");  
    }  
}
```

```
public class TicketPrintExample {  
    public static void main(String[] args) {  
        TrainTicket t1 = new OnlineTicket();  
        TrainTicket t2 = new CounterTicket();  
  
        t1.printTicket();  
        t2.printTicket();  
    }  
}
```
